UGONNA PAUL ANINWODO

Full Stack Software Engineer | React · Next.js · TypeScript · Node.js · Express · MongoDB

ugonnaaninwodo@gmail.com | +234 916 873 6860 | roto-dev.vercel.app | Ibadan, Nigeria (UTC+1) | Open to Remote

Professional Summary

Full Stack Software Engineer with nearly 3 years of experience building production web applications with React, Next.js, TypeScript, Node.js, Express, and MongoDB. Currently supporting web and mobile applications at Baruk Concepts, building secure backend services at Aegix, conversion-focused marketing sites at Enamly, and CRM and marketing automation systems at Pacetas. Experienced in REST and GraphQL API design, JWT authentication, role-based access control, payment integrations, and Figma-to-code delivery. Has shipped multi-role platforms with separate vendor, rider, and admin dashboards, and is comfortable owning features end to end, from database design to deployment. Experienced working asynchronously with distributed teams across time zones.

Technical Skills

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3
- **Frontend:** React.js, Next.js, Tailwind CSS, Bootstrap, Responsive Design, Figma-to-Code, Component-Based Architecture
- **Backend:** Node.js, Express.js, REST APIs, GraphQL, Middleware Development
- **Databases:** MongoDB, Firebase, Firestore
- **Auth & Security:** JWT Authentication, Role-Based Access Control (RBAC), Authorization Middleware, Session Management
- **CRM & Automation:** GoHighLevel (funnels, forms, calendars, workflows), Email & Webinar Automation
- **Integrations:** Paystack, Telegram, Third-Party REST APIs
- **Cloud & Tools:** Vercel, Render, Firebase Hosting, Git, GitHub, Postman, Thunder Client
- **Performance & SEO:** Site Speed Optimization, Technical SEO

Professional Experience

Full-Stack Developer & Website Support Engineer — Baruk Concepts Ltd (Remote) | Oct 2026 – Present

Develop and support the company's web and mobile applications, working across frontend and backend improvements, API integrations, database operations, troubleshooting, and deployment support.

Technologies used: Next.js, React.js, React Native, JavaScript, PHP, Laravel 11, Node.js, Express.js, MongoDB, Socket.IO, WordPress, Nginx, PM2, Linux, Git and GitHub.

Backend Developer — Aegix (Remote) | 2026 – Present

- Build RESTful backend services with Node.js and Express.js to manage users, roles, and operational workflows on an internal platform.
- Implement JWT authentication and role-based access control to secure access for administrators and field users.
- Design endpoints for user creation, role assignment, and profile management, with validation that prevents duplicate records and protects data integrity.
- Develop authorization middleware that enforces role-aware access across every API route.
- Test and verify routes with Thunder Client to confirm functionality and security before each release.

CRM & Marketing Automation Specialist — Pacetas (Remote) | 2026 – Present

- Build websites, landing pages, and webinar funnels designed to capture and convert leads.
- Set up and configure GoHighLevel accounts, including forms, calendars, pipelines, and automated workflows.
- Create email and webinar automation sequences that nurture leads without manual follow-up.

Software Engineer (Full Stack) — Enamly (Remote) | 2025 – Present

- Build responsive, conversion-focused interfaces for the marketing website of Enamly, an AI-powered receptionist platform.
- Develop landing page components designed to increase lead generation and demo bookings.
- Integrate GoHighLevel forms and calendar booking to streamline the demo scheduling flow.
- Diagnose and fix bugs, ship UI improvements, and release feature updates in a fast-moving production environment.
- Deploy through Vercel and optimize site performance to support marketing and SEO goals.

Full Stack Developer (Contract) — Neststacx (Remote) | 2024 | neststacx.com

- Designed, built, and deployed the full-stack corporate website for Neststacx, an IT consulting firm specializing in Zoho CRM, Monday.com, Zapier, and AI-driven automation.
- Built dedicated service pages for each consulting offering, with clear calls to action that drive consultation bookings.
- Developed a lead-capture contact system backed by a Node.js/Express API and MongoDB, so the team can manage and follow up on inquiries.
- Built client review and testimonial functionality to showcase social proof on the site.
- Delivered a clean, responsive UI optimized for performance across devices.

Freelance Full Stack Developer (Remote) | 2024 – Present

- Design and build SEO-optimized web applications on the MERN stack for clients in real estate, education, logistics, fashion, and SaaS.
- Convert Figma designs into responsive, pixel-perfect interfaces, using reusable components to speed up delivery.
- Develop backend APIs for authentication, business logic, and database operations, integrating third-party services as needed.
- Deploy and optimize production sites for startups and small businesses.

Projects

Velociti — Multi-Vendor Logistics Platform | velociti-sandy.vercel.app

Technologies: *Next.js, TypeScript, Tailwind CSS, Node.js, GraphQL, MongoDB*

- Built a multi-vendor logistics platform supporting separate vendor, rider, admin, and customer workflows.
- Implemented authentication and RBAC to separate vendor, rider, and admin dashboards within a single application.
- Developed order management and delivery tracking for end-to-end logistics operations.
- Designed an admin analytics dashboard for monitoring vendor and rider activity.

DevNest — Learning Management System | devnest-cyan.vercel.app

Technologies: *React, Node.js, Express, MongoDB, Paystack*

- Built a full-stack LMS with authentication, protected routes, and learner progress tracking.
- Integrated Paystack to power subscription-based course access and payments.
- Developed APIs to manage courses, enrollments, and learner data.
- Deployed the frontend on Vercel and the backend on Render as a multi-service setup.

Real Estate Platform | real-estate-ec94d.web.app

Technologies: *JavaScript, Firebase*

- Built a property listing platform with distinct user roles, a booking workflow, and a listing management dashboard.

Education

SQI College of ICT — Diploma in Web Development & Software Engineering | 2024 – Present
