

ANINWODO UGONNA PAUL

Software Engineer (Full Stack)

Email: ugonnaaninwodo@gmail.com
Phone / WhatsApp: +234 916 873 6860
Portfolio: <https://roto-dev.vercel.app/>
Location: Nigeria

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience building modern web applications and backend systems using JavaScript technologies. Skilled in developing responsive frontend interfaces and secure backend APIs using React.js, Next.js, Node.js, Express.js, and MongoDB. Experienced in converting Figma designs into production-ready applications and implementing authentication, role-based access control, and API integrations. Passionate about writing clean, maintainable code and developing scalable digital solutions across industries including real estate, marketing technology, and financial technology.

CORE SKILLS

- Frontend Development: HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Tailwind CSS, Bootstrap, Responsive Web Design, Figma to Code Conversion
- Backend Development: Node.js, Express.js, REST API Development, GraphQL, Authentication & Authorization, Role-Based Access Control (RBAC), API Integration
- Database & Cloud: MongoDB, Firebase, Firestore, Firebase Hosting
- Tools & Technologies: Git, GitHub, Vercel, Postman / Thunder Client, REST API Testing, SEO Optimization, Performance Optimization

PROFESSIONAL EXPERIENCE

Backend Developer — Aegix (Remote | 2026 – Present)

- Contributing to the development of a backend platform designed to manage users, roles, and operational workflows.
- Building RESTful backend services using Node.js and Express.js.
- Implementing JWT-based authentication for secure login and session management.
- Developing Role-Based Access Control (RBAC) to support administrators and field users.
- Creating backend endpoints for user creation, management, and role assignment.
- Implementing validation to prevent duplicate records and maintain database integrity.
- Developing middleware for authorization and secure API access.
- Testing backend routes using Thunder Client to verify endpoint functionality and security.

Software Engineer (Full Stack) — Enamly (Remote | 2025 – Present)

- Contributing to the development and improvement of the marketing website for Enamly, an AI-powered receptionist platform.
- Building responsive and conversion-focused user interfaces.
- Implementing landing page components to improve lead generation and demo bookings.
- Integrating GoHighLevel forms and calendar booking systems.
- Fixing bugs, improving UI, and implementing feature updates.

- Deploying updates using Vercel and improving site performance.
- Supporting SEO improvements and marketing performance optimization.

Freelance Full Stack Developer (Remote | 2024 – Present)

- Designed and developed responsive, SEO-optimized websites for startups and small businesses.
- Built scalable applications using the MERN stack.
- Converted Figma designs into responsive and pixel-perfect web interfaces.
- Developed backend APIs for authentication, logic, and database operations.
- Integrated third-party APIs and optimized website performance.

PROJECTS

- Real Estate Website – Responsive property listing platform (<https://real-estate-ec94d.web.app/>)
- Fashion Designer Landing Page – Brand exposure landing page (<https://aim-apperel.web.app/>)
- Trading Automation Landing Page – Marketing landing page for automation service (<https://tradesmart-pro.surge.sh/>)
- Portfolio Website – Personal portfolio (<https://roto-dev.vercel.app/>)

EDUCATION

SQI College of ICT — Diploma in Web Development & Software Engineering (2024 – Present)

ADDITIONAL INFORMATION

- Strong analytical and problem-solving ability
- Excellent communication and teamwork skills
- Fast learner with ability to adapt to new technologies
- Passionate about backend architecture, clean code, and scalable systems
- Experience collaborating with remote teams and delivering projects under deadlines
